

Minor Repairs

Whether your hardscape has an area that has sunk, lifted, or spread apart we can fix it while maintaining ICPI standards and specifications so it can stand resilient for years to come. We charge to repair your hardscape based on the time to lift and reset the paver blocks within the problem area. Common issues found in hardscapes over time can be uplifting caused by roots, sunken areas caused by moles or base erosion, or paver spreading caused by broken edge restraints. Any problem area over 75sft in size, will be given a recommendation to the nearest paver installer.
